# Our history tells who we are

We were born in 1993, when Mr. Ferdinando Ravelli, after several managing and entrepreneurial experiences, established Cutting Pack, one of the few Italian companies specialized in the Flexible Packaging and Technical Applications.

Over the years we built a very close-knit and highly qualified team for raw material type (**Aluminium, Polyester, Polyethylene, Polypropylene, Nylon, Barrier and Colored Films**), who enables us to be particularly competent, quick and reliable in all the services that we offer.

We always carefully test the reliability of our commercial partners and only when we are sure of their absolute reliability we build with them stable and long-lasting relationships.

**For us the success is made out of many small steps towards clear and shared goals with the customer.**
